

US Army Corps of Engineers Louisville District

The U.S. Army Corps of Engineers, in coordination with the Indianapolis Department of Public Works, will soon begin vegetation management work along the site of Phase 3B-3 of the Indianapolis North Flood Damage Reduction Project (also known as the Indy North Levee). Any clearing or grubbing will be limited to the public land on the east side of the Indianapolis Central Canal. You may see some construction vehicles in the area, but these should not disturb parking or regular traffic.
