Please rate your preference for Rocky Ripple flood protection options from 1 through 4, with 1 being the option you most favor and 4 being the option you least favor.

Do not do anything  
to current levee.

FEMA accredited 100  
year flood wall and/or  
levee along the river.  
Will affect vegetation  
and structures along  
river. Would involve  
loss of some homes  
along the river.  
Remaining homes  
would no longer have  
to pay flood insurance.

Restoration and  
structural improvement  
of the existing river  
levee. Will not affect  
flood insurance  
requirements for  
residents. Will affect  
vegetation and likely  
structures along river.

Other  
Please specify  
under comments  
below.

Would you be willing to support a tax levy specifically for development and maintenance of a local flood protection option that would include flood protection for Rocky Ripple?

- No     Yes    Comments:
